DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 11-18, and 22-24, drawn to selectively performing I/O operations, classified in class 710, subclass 6.
 - II. Claims 8-10, 19-21, and 25-27, drawn to separating I/O operations to achieve time slicing of a process, classified in class 710, subclass 58.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as time slicing could be used to achieve other effects such as preserving partially completed operations in case of power loss. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
